Offers a timeless
appreciation**

Why DRA?

37 years of
impeccable track record
in Bengaluru & Chennai

Base of 11,855
satisfied customers

Residential projects
worth Rs.2712 crores under
execution in
Bengaluru & Chennai

10 million+ sq.ft
of living space developed

Construction Timeline
Meter placed in all projects to
ensure real-time commitment
to on-time delivery

Chennai's first
developer to measure
customers' happiness through
customer delight meter

7,974 apartments
handed over

1st developer in
South India to introduce
a 24/7 WhatsApp chatbot
for after sales customer
experience

Why DRA Avalon?

A serene plot community in the upcoming neighbourhood of Parandhur

Prime investment opportunity ideal for prospective investors seeking long-term growth

Unmatched returns on your investment

Proximity to the upcoming Greenfield Airport, Chennai-Bangalore 6-line highway and plenty of automobile industries

Accessibility to major transportation hubs

Why Parandur is the perfect location for DRA Avalon

Plan for metro link to Parandur airport and Avadi taking shape

CHENNAI: The plan to extend metro rail to the proposed new airport at Parandur and to Avadi is starting to take shape. Chennai Metro Rail Limited (CMRL) floated a tender to prepare detailed project reports for the lines on Wednesday, two days after finance minister Thangam Thennarasu announced in the Budget that detailed project reports will be prepared for extending routes from Poonamallee to Parandur and Koyambedu to Avadi. In Jan, CMRL submitted a detailed feasibility report proposing around 19 elevated stations from Poonamallee to Parandur via Thirumazhisai and Sriperumbudur covering 43.63km. The line will be an extension of the 26.1km Lighthouse-Poonamallee corridor under phase-2. The DPR will have details on the route and alignment, number, location, size of stations, area of govt and private land required, type and number of trains required, and type and number of feeder services.

At Parandur airport, a CMRL official said, metro trains will take passengers inside the terminals proposed over 4,500 acres unlike at Meenambakkam airport where passengers are forced to walk a long distance to the terminals from the metro station. Passengers may also be able to reach the Parandur airport quicker as there will be only a few stations every 5km or more from Poonamallee. Nazarethpet, Chembarambakkam, Thirumazhisai, Pappanchatram, Chettipadu, Thandalam, Irungattukottai, Pennalur, Sriperumbudur, Sipcot, Mambakkam, Sunguvarchattiram and Neevavallur will be among the locations linked. We may have stations every 1km for the first 4km-5km. The total number of stations may reduce in the DPR stage, a CMRL official said. Parandur airport itself may have multiple stations as govt plans to develop an aerocity comprising a township with hotels, educational institutions, aviation ancillary units, and an MRO (maintenance, repair, and overhaul) hub for aircraft. The DFR for Koyambedu to Avadi (via Thirumangalam, Mogappair), submitted in Sept 2023, proposed 15 stations covering 16.07 km and estimated at 6,376.18 crore. Residents want CMRL to extend connectivity up to Pattabiram near Nemilichery Outer Ring Road, as it would allow people to travel from Koyambedu to Poonamallee via Avadi. The connectivity will benefit local residents, workers in industrial areas in Ponneri, Gummidipoondi, Thirumullaivoyal and Thirumudivakkam, and employees at IT park in Pattabiram, said T Sadagopan, president, Tamil Nadu Progressive Consumer Centre.

Defence Ministry's nod for site clearance to Chennai Greenfield airport project

The Ministry of Defence has granted No Objection for the grant of site clearance to set up a Greenfield Airport at Parandur near Chennai in Tamil Nadu. This is, however, subject to stipulated conditions. The same has been sent to Tamil Nadu Industrial Development Corporation on November 8 for information and compliance, Union Minister of State for the Ministry of Civil Aviation VK Singh said in a written reply in Rajya Sabha. The Defence Ministry on April 11 had advised to reconsider the proposed Greenfield Airport at Parandur due to close proximity of Tambaram, Arakkonam and Chennai International Airport, which may impose restrictions on military operations and may lead to adverse aerospace safety implications to all users.

The comments of the Defence Ministry were conveyed to the Project Proponent (Tidco) on April 21 and also to the Airports Authority of India. Subsequently, comments of TIDCO and the Airports Authority of India were sent to MoD for their consideration. No Objection granted.

The MoD finally granted the No Objection for grant of site clearance for the Greenfield Airport at Parandur, about 60 km west of Chennai in the Kanchipuram district. Reports say that the Tamil Nadu government has given administrative sanction for the new airport. An investment of ₹20,000 crore is being planned to develop a greenfield airport at Parandur, which would annually handle 10 crore people; it will have two runways, terminal buildings, taxiways, an apron, and a cargo terminal.

The Chennai airport handles around 2.2 crore people annually. After the ongoing modernisation work, it can handle 3.5 crore people a year for the next seven years.

Parandur Airport - Chennai's Second Airport New Chennai Greenfield International Airport

Latest Updates On Parandur Airport

Parandur Airport Gets Site Clearance Approval From Defence Ministry, Land Acquisition Process Begins

Dec 19, 2023: Parandur Airport has got the site clearance approval from the Ministry of Defence for setting up a Greenfield Airport near Chennai in Tamil Nadu. The authority sent the approval to the Tamil Nadu Industrial Development Corporation on 08th November 2023. The proposed Greenfield Parandur Airport will be located in the Kanchipuram district which is about 60 km west of Chennai. Tamil Nadu state government has also appointed a Special District Revenue Officer to begin with the land acquisition process. As per the project report, the airport has been planned to be constructed on a total of 5,746.18 acres of land. Out of the total land required, 1917.17 acres is owned by the Tamil Nadu government and the remaining 3774 acres is yet to be acquired.

Will the Parandur Airport Create a New Industrial Hub in South India

Chennai (Tamil Nadu) [India], December 30:

Many eyebrows were raised when Tamil Nadu Chief Minister MK Stalin announced the new airport in Chennai on August 20, 2022.

The proposed greenfield airport will be built in Parandur, about 57 kms from Chennai's Meenambakkam airport. The Parandur airport is reportedly said to bring exponential development to the state as well as the southern states. With a budget of Rs 20,000 crore, the ROI is said to be 3-fold. A second airport for Chennai is necessary for Tamil Nadu to achieve its goal of becoming a USD 1 trillion economy by 2030, said Thangam Thennarasu, the state's minister for industries, investment, promotion, and commerce.

Proposed changes to the AAI Act will permit the utilization of land surrounding airports for non-aviation activities. This means that even an IT company, unrelated to aviation, will have the opportunity to establish its office in these areas. Previously, only businesses associated with aviation, such as hotels, were allowed to utilize the land near airports. This construction is the perfect runway for multiple other projects to take off.

Connectivity

The government of Tamil Nadu made this decision due to the rising influx of passengers and cargo traffic at Chennai's Meenambakkam airport. With a proposed deadline of 2028, entrepreneurs are wasting no time in setting up their businesses, factories, and warehouses in localities with proximity to the airport. Several manufacturing companies based in India and outside, are actively considering setting up shop along the expressway because of the upcoming airport.

The new airport is great news for industries present in the region like TIDCO, Tamil Nadu Industrial Investment Corporation Limited (TIIIC), SIPCOT, and Tamil Nadu Small Industries Development Corporation Limited (TANSIDCO). This makes the movement of cargo easier and more efficient.

Chennai's metro rail is poised to extend up to the Parandur airport. The plan is to extend the Poonamallee-Sriperumbudur line by 28 kms to connect the new airport to the metro network.
